## **SLG Impact**

Throughout September, SLG will highlight “Together for Mental Health,” which encourages people to bring their voices together to advocate for better mental health care, including a crisis response system.

### **Individual Impact:**

- 78% of all people who die by suicide are male.
- Although more women than men attempt suicide, men are nearly 4x more likely to die by suicide.
- Suicide is the 2nd leading cause of death among people aged 10–34 and the 10th leading cause of death overall in the U.S.
- The overall suicide rate in the U.S. has increased by 35% since 1999.
- 46% of people who die by suicide had a diagnosed mental health condition.
- While nearly half of individuals who die by suicide have a diagnosed mental health condition, research shows that 90% experienced symptoms.

### **Community Impact:**

- Annual prevalence of serious thoughts of suicide, by U.S. demographic group:
  - 4.8% of all adults
  - 11.8% of young adults aged 18-25
  - 18.8% of high school students
  - 46.8% of lesbian, gay, and bisexual high school students
- Some of the highest rates of suicide in the U.S. are among American Indian/Alaska Native and non-Hispanic white communities.
- Lesbian, gay and bisexual youth are 4x more likely to attempt suicide than straight youth.

If you or someone you know is in an emergency, call **The National Suicide Prevention Lifeline** at 800-273-TALK (8255) or call 911 immediately.

*Data from CDC, NIMH and other select sources*

- Transgender adults are nearly 12x more likely to attempt suicide than the general population.
- Suicide is the leading cause of death for people held in local jails.
